COTTON SEED

Foundation D. & P. L. 14 Sold Out

Good Cotton Seed are in big demand. Rainy weather in some sections last fall ruined the germination. Our seed test 80% or better. Order early to avoid disappointment. With no more Breeder's or Foundation D. & P. L. 14 available, we recommend, as the nearest thing to them, our Blue Tag, Mississippi Certified, First-year, Delinted and Ceresan-treated seed quoted below. The bags are printed and carry the trade-mark of the Miss. Crop Improvement Ass'n. The other cotton seed we offer are Ala. grown, and good in every way.

2% CERESAN

Pays Big on Cotton Seed. Experiment Stations recommend it to improve stands and increase yield. Also fine for peanuts. See GFA Peanut Ass'n literature or write Ga. Experiment Station, Experiment, Ga. for Circular 131. Arasan also recommended for peanuts. See "over" for prices. Order early to be sure to have this material when you need it. Ask for folder about it, and also about seed treaters.

FUNK'S "G" HYBRID CORN FOR THE SOUTH

We are Associate Growers and Distributors for Alabama for Funk Bros. Seed Co., the pioneer hybrid seed corn breeders of the country. They are doing more research on Southern hybrid corn strains than any other breeders. The New "700 Series" strains are the result of this research. Our supply of G-717 is very limited. It is well suited for hogging off or for early feeding. It is also recommended for cribbing in the upper part of the cotton belt. G-714 is offered this year for the second time. It is very prolific, highly weevil-resistant, is of medium maturity and possesses excellent shuck coverage. Its production record in tests and field plantings permits us to recommend it for general planting in Ala. and adjoining states. It produces two large golden ears having excellent grain quality. Considered the best hybrid yet offered for this area. Plant it for more and better feed. Leave hybrids about 25% thicker than open-pollinated. G-724 is offered for the first time. Very similar to G-714, but expected to prove superior. G-527W is a white variety which we recommend, especially for the upper Cotton Belt, to those wanting white corn. All of the above numbers are Ala. or Miss. grown. Reports from those who planted these Funk's Hybrids last year are most gratifying, and orders being booked now are cutting our supply down rapidly. Book your needs with us promptly.

Our hybrid corn is graded according to size and shape to obtain uniform planting. Round grains will give as good results as flat. It usually takes a little more rounds. Both rounds and flats are graded into small, medium and large grains. We will try to ship your preference if you let us know. Planter plates should be used to suit size of grains being planted. Plant Funk's G-Hybrids in 1945 for greater yields and larger profits!

	Rounds	Flats
Funk's G-714 Hybrid per bu.	\$8.00	\$9.25
